

Thuc Hoang is currently the Deputy Assistant Deputy Administrator of the Office of Advanced Simulation and Computing (ASC) and Institutional Research and Development Programs in the Office of Defense Programs, within the Department of Energy (DOE), National Nuclear Security Administration (NNSA). The ASC program develops and deploys high-performance simulation capabilities and computational resources, including high-performance computing, artificial intelligence, and quantum computing, to support the NNSA's annual stockpile assessment and certification, and other nuclear security missions. She has almost 34 years of service with DOE and has been serving as a program manager for the ASC program in various capacities since December 1995, most recently as the Federal Program Manager of the NNSA Exascale Computing Initiative. Ms. Hoang holds a Bachelor of Science in Electrical Engineering from Virginia Tech and a Master of Science in Electrical Engineering from Johns Hopkins University.
